

MAXCRETE

PERMANENT CONCRETE REPAIR SYSTEM

MAXAM

PERMANENT CONCRETE REPAIR SYSTEM

The most highly developed solution in concrete repairs; MAXCRETE has been especially formulated to repair concrete and granolithic surfaces.

Expansion, contraction and general deterioration all have a detrimental effect, causing cracks, crumbling and breakdown.

Maxam's solution to this consists of chloride free cement powder and a unique binding liquid. This non solvent repair kit is very easy to use.

Whatever the damage MAXCRETE can handle it. Known and trusted for schools & colleges, local authorities, major transport establishments, universities, and hospitals.

KEY BENEFITS

- Simple application
- Stronger than concrete itself
- Can be applied in wet conditions, and temperatures down to 0°C
- No slumping – ideal for overhead and vertical applications
- Impervious to water, oil and grease
- Repair is dry within one hour
- Cures under water
- Can be feather-edged
- Resists acids and alkalis
- Gives a permanent repair – saving money

KEY APPLICATIONS

- Floors
- Beams
- Stairs
- Pavements
- Pipes
- Bridges
- Street light columns
- Manhole covers
- Kerbs
- Broken pavements

TECHNICAL DATA

A non-solvent combination of chloride free cement powder and a unique bonding liquid.

Compressive Strength at 1 day:
22.3N/mm²

Compressive Strength at 28 days:
32.02N/mm²

Tensile Strength: 6.0N/mm²

Flexural Strength : 10.6 N/mm²

Shelf Life: In excess of 12 months

Repair depth of up to 12mm, or for deeper application use in conjunction with chippings.

ORDERING INFORMATION

PROD. CODE	DESCRIPTION
MC8std	MAXCRETE repair kit. 2 x 8kg*

* Includes application instructions

100% NO RISK MONEY BACK GUARANTEE
