

Broken windows happen ... no building is exempt.

It's impossible to predict when they might happen. They can be deliberate or accidental. Boarding up is the short-term traditional method of making safe. But this is expensive, unsightly, often insecure and destructive, which can result in irreparable damage to upvc frames and double glazed units. Worse still it tends to attract vandalism like a magnet.

**There is, of course a much better way.**

A **cost saving, faster** and **practically invisible** way. We call it

**MAXAM175®**

**GLASS REPAIR FILM**

you'll call it amazing!

**MAXAM®**

OPTIMAL PROPERTY MAINTENANCE PRODUCTS

## FOR EFFECTIVELY DEALING WITH BROKEN GLASS IN AN EMERGENCY

With

**MAXAM175®**  
GLASS REPAIR FILM

you have the peace of mind knowing you can make safe a broken window in seconds.

Being one third the tensile strength of steel, it's incredibly strong and sticky, and is awarded top impact resistance standard BS12600 1B1, your guarantee of highest security.

Because Maxam175 is so robust and almost invisible, it's a very effective alternative to steel sheets and plywood on void properties, maintaining a safe and aesthetically pleasing environment. It is also a preferred method of permanently stabilizing weak and vulnerable glass, which saves costly replacement.

### AN UNSIGHTLY BOARD...

- X** causes disruption and damages window frames
- X** risks exposure to dangerous broken glass
- X** is psychologically depressing
- X** blocks out light and looks awful
- X** invites further vandalism
- X** is often not secure and very expensive

OR

### VERY EFFECTIVE, EASY TO APPLY

**MAXAM175®**  
GLASS REPAIR FILM

- ✓** takes seconds to apply with no tools
- ✓** is aesthetically pleasing with no loss of daylight
- ✓** goes on silently, no noisy sawing or hammering
- ✓** is highly secure yet almost invisible
- ✓** completely seals out the elements
- ✓** is perfect for repairs in PVC frames and double glazing

**Its so easy to apply**, just cut to size, peel back the paper and smooth over with a cloth. Your window is both safe and weatherproof immediately. The frame is undamaged and you get full natural daylight too. And when you come to reglaze, the old glass comes out all together, and firmly attached to the film.  
**It is successfully used every year on around half a million broken windows; can you afford not to rely on it too?**

## It's as easy as 1-2-3

1. MEASURE

2. CUT

3. APPLY

Maxam175 is in constant use by Social Housing groups and Local Governments in almost every city in the UK. As well as being used in many other sectors. It is established in many countries worldwide through our network of distributors.... where it has become the number 1 trusted global brand.

Available from many major builders merchants or directly from maxam
